CNXBTOKEN

Company Introduction.

Coinex Block combat to be the most business and consumer-friendly blockchain ecosystem for the mainstream adoption of web-3 payments.CNXB is the most powerful projects of Coinex Block and a community-oriented decentralized cryptocurrency that seeks to build the largest and most diversified global crypto community. CNXB token is built on BSC (BEP-20) blockchain. It's a decentralized community-driven token,to bring the unique thrust system code deploying on binance smart chain for the first time to bring passive feature income hardcoded into our contract to top until it reaches a threshold. This factor implies that users or the project's team built on the BSC network will be extremely safe and rewarding on the spot for long-term holders. The best part is that the tax system is part of the thrust system. It is a platform that values our investments and time, as evidenced by its tagline, " More in Return". By keeping our word, we hope to fulfill our promise to make your investment-worthy.

Company Objectives

The goal for developing CNXB Token is to see how individuals from all over the globe react to the idea of building a massive community centered around cryptocurrency and its utility. Our development team comprises passionate community members who share a vision of wealth and genuine decentralization. Currently, we are actively developing a module that will enable a transition to a new authentically decentralized governance model for Coinex Block community. Coinex Block is a catalyst for communal Synergy, built on the foundation of trust and transparency. It provides a Sanctuary for users to confidently engage in Purchase and Hold their CNXB Token for Long or Mid Term, fostering an environment where contributions. converge to generate shared wealth. Beyond a mere financial instrument, Coinex Block Serves as a conduit for community solidarity, Promoting inclusivity and mutual benefit. By nurturing a space where users actively Participate in the collaborative Process of wealth creation, Coinex Block fosters a sense of belonging and Joint ownership, setting the stage for a future where collective efforts drive inclusive financial growth and where communities thrive through co-operative endeavors.

The token's official name is CNXB Token, and its ticker symbol is CNXB. It is built on the BNB (BEP20) Smart chain, a safe and scalable blockchain platform that enables quick and efficient transactions.

Why CNXB is a BEP-20 Token?

The invention of Ethereum was revolutionary to the blockchain ecosystem as a whole, as for the first time ever people gained a way to launch their own tokens and smart contracts. For years, the Ethereum network was the default place for launching innovative blockchain-based projects.however, the increasing popularity of cryptocurrencies, and the advent of decentralized finance (DeFi) solutions specifically, has caused massive problems with the efficiency of the Ethereum blockchain.

The transaction times and fees on the Ethereum network has become so high that many crypto enthusiasts stopped using ETH altogether, and blockchain developers started to look for a better alternative. That's what led to the creation of Binance Smart Chain.

What is Binance Smart Chain?

Binance Smart Chain (BSC) is a high-end blockchain infrastructure created by Binance, one of the world leaders in providing blockchain solutions. Binance Smart Chain was designed to fulfill the same purposes as Ethereum - the ability to launch tokens, smart contracts and decentralized applications - but with a much better efficiency.

While the Ethereum network uses a token format called ERC-20, the BSC blockchain has its original, innovative token format: BEP-20. Tokens utilizing the BEP-20 format can be purchased, sold and transferred with the fees that can be 30-100x lower compared to Ethereum fees.

Not only the fees, but also the transaction times of Binance Smart Chain are much lower than Ethereum's. Overall, BSC is simply a much more effective solution than ETH. Since CNXB is an ecologically oriented project, choosing the more energy-efficient solution was the obvious choice to make.

Disclaimers

We know that this will be a completely competitive space. There are probably thousands of team's planning on building a crypto network. Competition will be fierce. But In this age, this is a common risk in any decent Start-up or mature company. The question is: Given our team, track record, experience, industry resources and Product, do you believe we stand a better chance than the rest of the pack? If Yes, Then please join our Coinex Block & hold CNXB Token.

Conclusion

A cryptocurrency is more than the sum of its protocols, source code and utility. It is ultimately a social system that inspires, enables and connects people.Frustrated by the many half measures, failures and broken promises of past protocols, we set out to build something better. This process is not simple nor have we everbelieved it can finish. Social protocols continue indefinitely changing as people and society change. To be useful, we want to trap the power of evolution and port it into Coinex Block Token.
